

Web Accessibility for Deaf and Hard of Hearing **TROUGH IDEAS**

SLI5 Module

Sign Language Interpreter (SLI) 5 Module provides a simple and effective way to meet accessibility requirements for deaf and hard of hearing web users. By combining different multimedia elements (video, audio and subtitles), SLI5 delivers an engaging experience to end-users. It is a cross-browser and a mobile-friendly web solution.

FEATURES

Cross-Browser

Works with Internet Explorer, Edge, FireFox, Chrome, Opera and Safari.

1

Accessible

Combines different modalities: sign language video, audio and subtitles.

2

Integration

Provides simple integration into existing websites (no need for a new one).
